TABLE OF STATEMENT OF COMPLIANCE

S/N	Compliance Statement/Technical Specification	Indicate whether Comply or Not Comply	Remarks (if any , Evidence or explanations on how the compliance will be achieved or not)
1.0	**General Attributes**		
1.1	Provide and Install fixed Vehicle tracking devices to transporters by either selling, leasing or hiring to them		
1.2	Provide maintenance services to the fixed tracking devices sold ,leased or hired to transporters		
1.3	Prepare a middleware or an integrating mechanism with LATRA VTS platform using given API or another agreed mechanism		
1.4	Comply with **ALL** requirements as specified in the API or another agreed mechanism.		
1.5	Provide a mechanism / interface where LATRA can directly interrogate and manage on real time the tracking device and update some parameters such as speed limit at any time		
1.6	Ensure that GPS data transmitted to LATRA VTS platform is complete, correct and accurate		
1.7	Inform LATRA of the availability of new Technology on Tracking System and devices from Time to time		
1.8	Ensure there is **NO TEMPERING** of the fitted tracking device		
1.9	Ensure that fitted tracking devices are transmitting to LATRA VTS Application 24/7		
1.10	Report immediately to LATRA of any event that could lead to the tracking device not working properly (such as accident, theft etc.)		

S/N	Compliance Statement/Technical Specification	Indicate whether Comply or Not Comply	Remarks (if any , Evidence or explanations on how the compliance will be achieved or not)
1.11	Ensure compliance with standards specifications of the fixed tracking devices as set by LATRA including integration to the system using the API provided by LATRA under annexure-1		
1.12	Provide Training on the use of fitted tracking devices to Transporters and other Stake holders		
1.13	Provide access and information to LATRA at any given time for the GPS data receiving, integration/ middleware platform for auditing and quality assurance purposes		
1.14	Settle GPS/GPRS communication charges claim made by the client within seven days from submission of such claim		
1.15	Provide GPS positioning values		
1.16	Provide Alerts information		
1.17	Updating of GPS values for at least every 3 min. During an emergency event especially over-speeding update real time Device GPS information value with the emergency event ID every second until that event ends/stops.		
1.18	Storing of alerts information while disconnected from GSM network and updating back to central server upon connection to GSM network		
1.19	Provide Low battery alerts		
1.20	Provide alerts on Lost connection with tracking units		
1.21	Provide damage alerts from tracking units		
1.22	API provided or any other agreed integration mechanism may be changed or updated by LATRA from		

S/N	Compliance Statement/Technical Specification	Indicate whether Comply or Not Comply	Remarks (if any , Evidence or explanations on how the compliance will be achieved or not)
	time to time depending on the need, or change in technology, which may lead for you (the bidder) to change immediately the way you integrate or communicate with VTS at no cost to LATRA.		
1.23	Submit of Complete documentation of the tracking devices (including all associated protocols) Applicable for **non** BSMART devices		
2.0	**Specific events/ attributes to be sent to the VTS platform**		
2.1	Vehicle Registration Number		
2.2	Driver's Name (Driver Identification such as use of i-Button or similar)		
2.3	Latitude (in decimal degrees)		
2.4	Longitude (in decimal degrees)		
2.5	Altitude (in meters above sea level)		
2.6	GPS timestamp (YYYY-MM-DD HH:MM:SS)		
2.7	Speed (km/h)		
2.8	Bearing (Direction In degrees)		
2.9	Odometer (KM)		
2.10	Satellite count (Receivable number of satellites)		
2.11	HDOP (Horizontal Dilution of Precision-Quality of signal)		
2.12	RSSI (Received Signal Strength Indication)		
2.13	LAC (Local Area Code)		
2.14	Cell ID (Cell ID)		
2.15	MCC (Mobile Country Code)		
2.16	IMEI (International Mobile Equipment Identity)		
2.17	Data Received Time (Time Received by Server – YYYY-MM-DD HH:MM:SS)		
2.18	Data Process Time (Time insert into Database – YYYY-MM-DD HH:MM:SS)		

S/N	Compliance Statement/Technical Specification	Indicate whether Comply or Not Comply	Remarks (if any , Evidence or explanations on how the compliance will be achieved or not)
2.19	MSG_ID (Unique data running number-64bits)		
3.0	**Vehicle specific activities for each event sent to the VTS**		
3.1	Movement/Logging (Default)		
3.2	Engine ON		
3.3	Engine OFF		
3.4	Speeding		
3.5	Hash Braking		
3.6	Hash Turning		
3.7	Hash Acceleration		
3.8	Panic Button (Driver's Side)		
3.9	Internal Battery Low		
3.10	External Battery Disconnected		
3.11	Excessive Idle		
3.12	Accident		
3.13	Panic Button (Passenger Side)		
3.14	Device Tempering		
3.15	Black box Data logging		
3.16	External Power Voltage		
3.17	Device Internal Battery Voltage		
3.18	Black Box Data logging		
3.19	Fuel data report
